

Blood pressure

A risk factor for heart attack and stroke

When your heart beats it pumps blood around your body. As the blood moves it pushes against the sides of blood vessels called arteries. The strength of this pushing is your blood pressure

Most people don't know if they have high blood pressure as often there are no symptoms. The only way to find out is to get it checked

HIGH blood pressure

also called hypertension, puts too much force on your artery walls. Over time this can lead to damaged arteries and increase your risk of heart attack and stroke

admitted to hospital with a heart attack have high blood pressure

it can also lead to problems with your eyes and kidneys

CHOICES YOU CAN MAKE TO LOWER RISK OF HEART ATTACK & STROKE

Stop smoking

Make heart healthy eating and drinking choices

Move more

Lose weight

Take medications
