- Affordable Cost of Living
- Excellent School Systems with Gifted and Talented Programs
- Fabulous Outdoor Activities

YOUR PARTNER IN HEALTH SINCE 1949

Area residents choose Coffeyville Regional Medical Center because they know and trust our CRMC family caring for theirs. We offer many of the same quality services and medical technology you will find in larger facilities.

Coffeyville Regional Medical Center is a 501(c)3 municipal, non-profit hospital licensed for 47 beds. On an annual basis, we serve over 45,000 patients from Montgomery, Chautauqua, Labette, Allen, Neosho, and Wilson counties in Kansas, as well as Nowata, and Craig counties from Oklahoma. Established in 1949, CRMC has grown over the years and expanded its facilities and technology to stay current with today's world.

Our mission is to serve our patients and families with the highest quality healthcare.

As a rural hospital, Coffeyville Regional Medical Center is surprising because of its large size and wide variety of services. Although we can provide many of the same services you will find in the big city, we take pride in our friendly and caring staff. Our physicians have lived, worked and been involved in our community for many years. Some have been here for 30+ years; they know you, not only as a patient, but as a friend and neighbor.

QUICK FACTS

Annual Admissions: Nearly 2,500
Births: Nearly 300
Surgeries: Nearly 3,000
ER Visits: Nearly 10,000
Home Health Visits: Nearly 8,000

The Region's #1 Choice for Women's Health Services!

Whether a patient is in the immediate planning stages for their family, or looking to the future – when it comes to having a baby – Nobody delivers like CRMC.

Women deserve a special place for their healthcare. The Geeta Sandhu Women's Health Services Unit offers a comfortable, friendly and family-centered environment for our patients and their families when having a baby at Coffeyville Regional Medical Center.

From the time they learn they are pregnant, until birth and beyond, we will help make this special time in their lives a memorable and exciting experience

CRMC Medical Group is located in four convenient locations to better suit our patient needs. These clinics are run and operated by Coffeyville Regional Medical Center. Area residents choose CRMC Medical Group because they know and trust our CRMC family caring for theirs.

Our clinics are located in Coffeyville and Independence.

Geeta Sandhu Women's Health Unit at Coffeyville Regional Medical Center

Dawna Regis, RN | Women's Health

Geeta Sandhu Women's Health Unit

The Women's Health Unit allows patients to labor, deliver and recover in the same room. Patients also have whirlpool tubs available to use during labor to help relieve their pain. A dedicated surgical suite is available in the Geeta Sandhu Women's Health Unit for planned or emergency cesarean sections.

The medical staff, here at CRMC, strives to develop a personal relationship with each patient during their time together. The staff are experienced in calming patients and assisting them through the joys and trials of labor and delivery.

Expectant mothers are able to move down the hall for their surgery and then return to their room. "The Women's Health Unit staff puts their patients first," said Dr. Dara Gibson. "The staff care about their patient's pain and try to make them comfortable. The whirlpool tubs offer great heat therapy for relaxing muscles during labor and our anesthesia team is readily available for epidurals."

Security is of the utmost importance and all infants have security bracelets that match their parents. Infants also receive a security ankle bracelet shortly after birth that

will sound an alarm if the baby were removed from the locked department. New mothers can expect support and training prior to and after the birth of their child.

CRMC offers free childbirth education classes to help parents prepare for the birth of their child. The class includes education on the stages of labor, breastfeeding, postpartum, infant care and also includes a tour of the Women's Health Unit.

Expectant mothers may also receive a 3D/4D ultrasound in the recently renovated OB Ultrasound room. The room was designed with seating for family members to view the ultrasound live or allow family to see pictures of the baby on a 50" flat screen TV in an adjacent room.

CRMC recognizes that fathers are an important part of the delivery process! That's why each room has a sofa sleeper for their comfort.

Call our Women's Health Unit at 620-252-1589 and schedule your appointment.

WOMEN'S HEALTH SERVICES

CRMC's Geeta Sandhu Women's Health Unit cares for women through all stages of life. The physicians, nurses and staff are dedicated to giving patients and their families the best experience possible whether experiencing the joys of a newborn baby or helping them recover from a hysterectomy.

Our medical imaging department has state-of-the-art equipment to meet the special needs of women: ultrasound with fetal 3D/4D, mammography and bone density testing. We are prepared to provide comprehensive healthcare to women of all ages in collaboration with our fine team of staff and physicians.

Women's Services include:

- Childbirth education
- Certified lactation consultants
- Cesarean section
- Postpartum support
- 3D/4D ultrasound
- 3D Digital mammography
- Laproscopic hysterectomy
- Infertility management
- Bladder lift
- Maternal and infant health services
- Osteoporosis screening
- Tubal ligation
- Hysterectomy
- Wee Care Baby support
- Urinary incontinence

Oh baby! A new kind of pregnancy and birthing experience!

Whether you are in the immediate planning stages for your family, or looking to the future – when it comes to having a baby – Nobody delivers like CRMC.

Oh Baby! You're going to like it! Our Oh Baby! program enhances the experience of having your baby, with access to a multitude of services and practical gifts that center on pregnancy, birth, and wellness for both baby and mom.

Some of the amenities include Oh Baby! gifts. Your baby will receive a darling sleep gown, and CRMC will post a baby announcement on CRMC's Facebook page #BornAtCRMC.

Services to Educate and Support New Moms

Expectant parents can also take advantage of a variety of other services:

- **Childbirth education** – These classes prepare the mother and father (or other support person) emotionally, physically and intellectually for active participation in the birthing process. The course includes relaxation exercises, what to expect during labor and delivery, breathing and pushing techniques and care after birth, including breastfeeding. Childbirth Education is free to women delivering at CRMC.

- **High Five for Mom and Baby Program** – CRMC participates in this program, provided by the United Methodist Health Ministry Fund, at no charge to Kansas hospitals that qualify. The program is based on five crucial steps necessary for a successful breastfeeding experience.

- **Certified Lactation Consultants**, two registered nurses are available on the unit to help any mother with questions and concerns about breastfeeding.

- **3D and 4D Ultrasound** - "Will I have a boy or girl?" CRMC offers a fetal sex ultrasound at around 18-22 weeks of pregnancy. The fetal sex ultrasound does not require a doctor's order, but there is a fee for this service.

- **Maternal & Infant Services (M&I)** – This clinic provides comprehensive prenatal care and follow-up for mother and infant for up to one year post delivery. The M&I clinic is located at the CRMC Medical Group in Independence and is offered every Wednesday from 9:00am – 4:00pm. Financial assistance and a nutritionist are available to expectant mothers during their visits. Patients will see Judy Carpenter, APRN for the majority of their appointments, and then will be provided a CRMC Medical Group OB/GYN physician for the last four weeks of pregnancy. Post-op care is provided, as well.

- **Wee Care Baby Support** – CRMC helps new mothers in the adjustment period of parenting with all its new responsibilities. We understand many questions and fears may arise in the first weeks and months when a new little one joins the family. Mothers are encouraged to come with baby to the Geeta Sandhu Women's Health Services unit to receive support and encouragement.

Women & Wellness

Only at Coffeyville Regional Medical Center

A Simple Approach to Better Health for You and Your Family

Offering support, education and care navigation to help women achieve and maintain optimal health.

Coffeyville Regional Medical Center's Women & Wellness (W&W) program is an innovative way to keep women engaged and active in maintaining their own health and improving the health of their families. The mission of W&W is to empower women by providing them with access to:

- Care Navigation
- Education
- Support

Women manage multiple roles – parent, spouse, caregiver, and employee – they are stretched too thin. The W&W program will assist members with the personal resources they need to make decisions and begin their journey to optimal health and wellness.

Dealing with a health decision is tough enough – navigating through our healthcare system shouldn't be.

CRMC is the only hospital in the region to offer such a premier, one-on-one, personal and comprehensive program – One that reaches out to all women in our service area.

CRMC Women's Health Cancer Survivor

Benefits:

Our women's health program offers comprehensive support to ease the stress of your healthcare responsibilities and empower you to better care for yourself and your family! Benefits of Women & Wellness include:

- Personalized outreach from our Women's Health Care Navigators. The Care Navigator assists you in accessing healthcare providers, provide health information, referrals and help you take advantage of CRMC's full range of services, such as support groups, community resources and educational programs.
- New member orientation and tour. New members can learn about the full benefits of the Women & Wellness program by attending our new member orientation. You will meet the Care Navigators, receive a full explanation of Women & Wellness benefits, and more. A healthy lunch and facility tour are included.
- Reduced fees. Enjoy reduced fees for CRMC's educational classes, programs and events year-round.
- Health news updates. At crmcinc.org/Women&Wellness and through our email blasts, Facebook page and quarterly newsletter, get the latest health and nutrition information, and information on exclusive members-only events.
- Programs for you. From young adult, to motherhood, to mid-life and mature adult — we have seminars and activities suited just for you.

Meet our Director

Jennifer Wintjen, RN
Women's Health Director

If you have any questions about any of the classes or about the Women's Health Department feel free to contact Jennifer at 620-252-1589 or email her at wintjen@crmcinc.org

Breast Health Nurse Navigator

Christy McCullough, MSN
Interventionsal Radiology Nurse
& Breast Health Navigator

A Breast Health Nurse Navigator is a Registered Nurse who is specifically trained and educated to help breast cancer patients “navigate” the steps involved in seeking treatment and care in the ever-complex health care system.

She can answer your questions and explain medical procedures, and she can provide comfort, compassion and emotional support to you and your family. The Breast Health Nurse Navigator program provides for a speedier process beneficial to the patient when time is critical.

“As the Breast Health Nurse Navigator, if needed, I am able to refer those patients to an oncologist, cancer center or general surgeon of their choosing. If they choose to continue their care at CRMC, I am able to follow up with them more closely. These dual roles allow me to be with the patient every step of the way and help them know they have someone by their side; I try to make a scary situation easier to handle.”

Christy is located in the Medical Imaging Department. She is available to assist all breast cancer patients and their families through diagnosis, surgery and post-surgery. She can answer questions and inform patients on what to expect all while providing emotional support throughout the process.

Hologic Genius™ 3D Mammography

The CRMC Foundation understands the critical need of this Imaging Campaign and the benefits patients will encounter with these digital upgrades.

That is why The Foundation generously purchased the Genius 3D Mammogram Unit – the newest on the market from Hologic – for CRMC. This impressive equipment will allow us to provide the best possible images, with less pain and less radiation exposure while performing a mammogram, than ever before.

The Genius™ 3D

The Genius 3D Mammography exam allows doctors to examine your breast tissue layer by layer. So, instead of viewing all of the complexities of your breast tissue in a flat image, as with conventional 2D mammography, fine details are more visible and no longer hidden by the tissue above or below. The Genius exam consists of a 2D and 3D™ image set, where the 2D image can be either an acquired 2D image or a 2D image generated from the 3D™ image set.

More than 200 clinical studies have shown that by using this technology, doctors are able to screen for breast cancer with greater accuracy — which means better breast cancer detection and a reduced chance of being called back for additional screenings.

PATIENT BENEFITS:

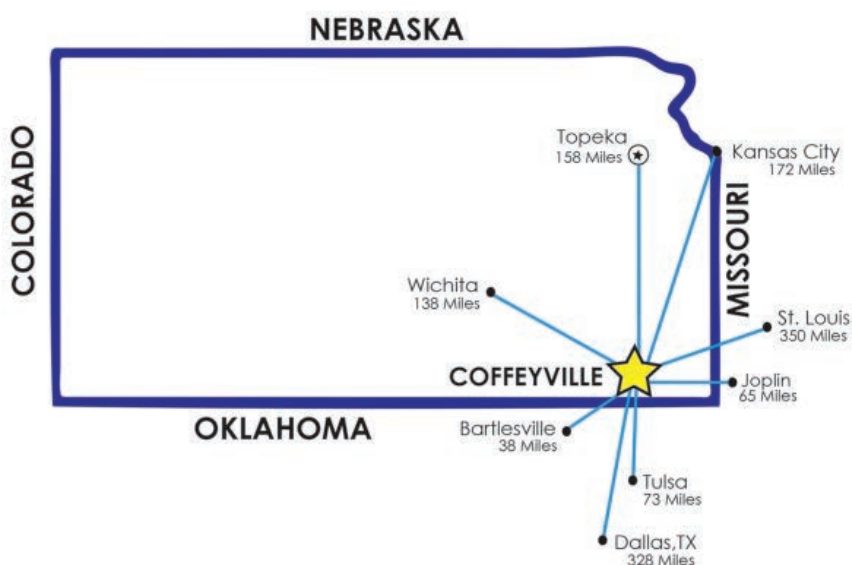

- 30% Lower Radiation Dose
- Greater Comfort
- Uncompromised Image Quality

living in **Coffeyville, Kansas**

Coffeyville is located in Southeast Kansas, in Montgomery County. It offers a rich historical background while providing small town charm with big town amenities. In the Southeast region there are enough trees and hills to stifle the stereotypical Kansas landscape, and several big cities are just a short drive away. Whether you are getting involved in our city's activities or enjoying the great outdoors, there is always something to do in Coffeyville.

If you have a strong desire to be a part of a nationally recognized organization focused on quality patient care and safety - and finding balance between work and home, we encourage you to look at CRMC as your career choice.

CRMC is the only hospital in the region to be accredited by The Joint Commission, receiving their "Gold Seal of Approval." This demonstrates our commitment to deliver the best possible healthcare in all areas of service.
