

No scars, less pain and a quick return to your busy life

500,000
HYSTERECTOMIES^{1,2}

are performed each year in the U.S.

The average age a woman receives a hysterectomy is

40-45
years old.

vNOTES

vNOTES (vaginal natural orifice transluminal endoscopic surgery) is a minimally invasive gynecologic approach using the vagina as a surgical access route. Hysterectomy is the most common procedure performed via the vNOTES technique.

vNOTES PROCEDURES

- Hysterectomy
- Salpingectomy
- Oophorectomy
- Salpingo-oophorectomy
- Cystectomy

CONDITIONS TREATED BY vNOTES

- Adnexal pathology
- Abnormal uterine bleeding
- Chronic pelvic pain
- Fibroids
- Prolapse of the uterus

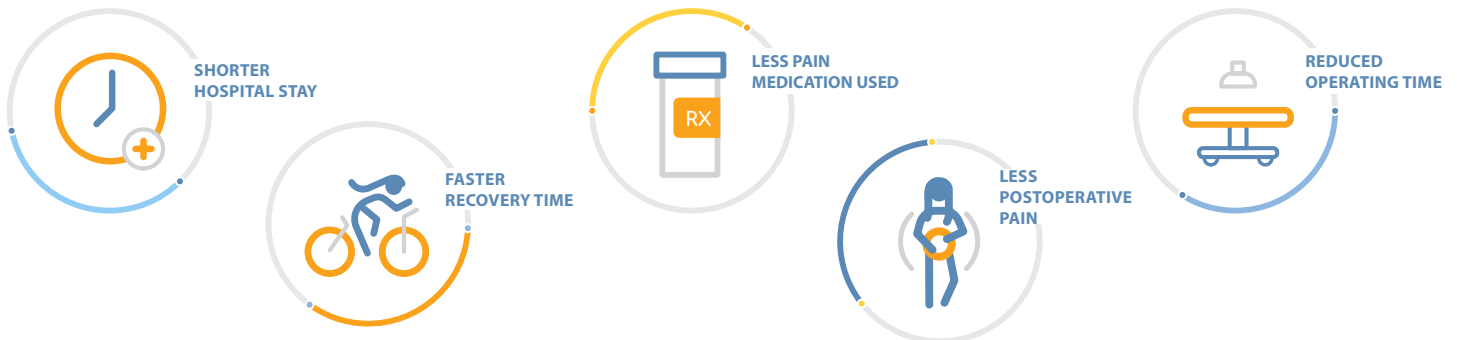

SURGICAL SOCIETY RECOMMENDATIONS

The following surgical societies have recommended vaginal hysterectomy, whenever feasible, as the approach of choice:^{4,5}

- American College of Obstetricians and Gynecologists (ACOG)
- American Association of Gynecologic Laparoscopists (AAGL)

BENEFITS

vNOTES has been shown to provide the following benefits to patients compared to the laparoscopic approach:³
