CRMC SPECIALTY CLINIC

William Tinker, MD
Cardiology

Amber Lopez, APRN
Cardiology

CARDIOLOGY SERVICES

We provide comprehensive cardiovascular care with a team-based approach to cardiac care, allowing patients to benefit from collective expertise and decades of experience in evaluating and treating such conditions as irregular heartbeat, heart attack, heart failure, coronary artery disease, valve disorders, peripheral vascular disease,

carotid disease, aneurysms, and other cardiovascular and thoracic disorders.

Our Cardiology staff at CRMC believes that the patient is the center of our practice and we are committed to providing the highest level of heart and vascular care through communication, clinical evaluation, and technology.

Our cardiology team at Coffeyville Regional Medical Center will work hard to evaluate your condition and recommend treatment options that will best meet your unique needs.

Your heart and vascular health is our top priority at CRMC and you should take comfort in knowing we are here for you, offering the latest cardiovascular tests and treatments including:

- Cardiac rehabilitation
- Heart rhythm monitoring
- General cardiology consultation
- Exercise Stress testing
- Nuclear Stress testing
- Echocardiography
- Pacemaker/Defibrillator Implantation and Monitoring
- Electrocardiogram testing of the heart's electrical activity (EKG testing)
- Anticoagulation therapy and management for heart valve patient
- Vascular ultrasounds

CRMC offers treatment for cardiac issues through our cardiac rehabilitation services and pacemaker clinic.

K. Sunil Menon, MD
Orthopedic Surgeon

ORTHOPEDIC SERVICES

Coffeyville Regional Medical Center offers orthopedic services to maintain and restore active, healthy lifestyles. Offering a spectrum of services from physical therapy to surgery and rehabilitation, our skilled physicians and therapists want to reduce pain and improve mobility.

When nonsurgical interventions are no longer helping to alleviate your pain - such as medication and physical therapy - then it may be time for hip, knee, or shoulder replacement. Other signs may be aching in the joint, followed by periods of relative relief; pain after extensive use; loss of mobility; joint stiffness after periods of inactivity or rest; and/or pain that seems to increase in humid weather.

Joint Camp at CRMC

We understand that a decision to have joint replacement surgery is made with care. Our orthopedic team is there to assist you and your family on your journey towards a better life. We strive

to provide excellent care, to exceed your expectations, and we want you to achieve a full recovery so you can get back to your life as quickly as possible. This will be accomplished as you and your orthopedic team members (nurses, physician, and therapists) work together.

Rehabilitation - An Integral Part of Your Joint Replacement

Physical Therapy provides a very important role in the final phase of a patient's recuperation from joint replacement. The physical therapist is licensed to provide therapy for the entire body.

According to Darci Berry, DPT, Director of Rehabilitation Services, inpatients are seen for therapy seven days a week while they are here recovering - including Saturday and Sunday.

SURGICAL SERVICES

General Surgery is a multifaceted discipline that serves as a central hub of medical knowledge, encompassing crucial elements such as anatomy, physiology, healing processes, nutrition, and diseases. This comprehensive understanding forms the bedrock shared by various surgical specialties, making it a pivotal aspect of our healthcare system. Within our specialized surgery department at CRMC, we go beyond the theoretical framework, translating this knowledge into bespoke care plans that prioritize your well-being and facilitate a prompt recovery. Our approach is grounded in creating a patient-centric environment that fosters comfort and instills confidence.

At CRMC, we recognize the significance of skilled hands guiding your healthcare journey. Whether you are on the verge of undergoing surgery or seeking proximity to a hospital prepared for any medical eventuality, we strive to provide assurance through expertise and compassionate care. Our commitment extends to delivering high-quality surgical services to our community. From the moment you step through our doors until the day of your discharge, our unwavering dedication is evident in every aspect of your healthcare experience.

Brittany Love, MD
General Surgery

Michelle McGuirk, MD
General Surgery

We don't just aim to offer a service; our goal is to elevate your overall care, ensuring a superior and supportive environment throughout your medical journey.

EMERGENCY SERVICES

When you need help right away, our emergency department is staffed 24 hours a day, seven days a week with highly trained medical personnel and the latest technology. Nurses and doctors are there all day and night to care for medical problems that need quick attention.

Personnel in the lab, surgery and medical imaging departments are also available to support any emergency.

Our **CRMC EMS** covers the southern portion of Montgomery County, the southwestern corner of Labette County and the northeast corner of Nowata County in Oklahoma. They work very closely with the police and fire departments, standing by for police raids and structure fires.

The rural and city fire departments will respond with EMS when requested to provide added manpower and render initial first responder care.

GENERAL

The CRMC emergency department has state-of-the-art equipment, two trauma rooms, five medical beds and one orthopedic room. On average, our personnel see nearly 35 patients per day.

DOCTORS SPECIALIZING IN EMERGENCY MEDICINE

When you have an emergency, being seen by a physician who is board certified/eligible in emergency medicine is critical.

Emergency medicine physicians are specifically trained to treat patients in an emergent situation—ruling out the most life-threatening diagnosis first.

The CRMC ER is ready to help-24/7. Our award-winning emergency department is staffed with highly-trained trauma nurses, support staff and physicians who all have advanced cardiac life support and advanced trauma life support training.

WOMEN'S HEALTH SERVICES

WOMEN'S WELLNESS AND PREVENTIVE CARE

Women of all stages and ages in life share specific health needs and concerns. From puberty to menopause and well beyond, CRMC physicians provide guidance, exams and treatments necessary to ensure women stay healthy throughout their life.

CRMC Medical Group clinics have OB/GYN and family physicians to provide annual wellness exams, mammograms, obstetrics and other gynecological services individualized for each patient.

WOMEN'S SERVICES INCLUDE:

- 3D/4D ultrasound
- Bladder lift
- Cesarean section
- Childbirth education
- Digital mammography
- Hysterectomy
- Osteoporosis screening
- Postpartum support
- Tubal ligation
- Well Woman Exam
- VNotes*

VNOTES (vaginal natural orifice transluminal endoscopic surgery) is an advanced minimally invasive gynecologic surgery that combines the benefits of the laparoscopic and vaginal approaches to gynecologic surgery. This allows complex surgery to be performed without visible incisions with faster recovery and return to normal activities.
